Solutions to Week in Review 9

- 1. a.) Diverges by integral test
 - b.) Converges by comparison test or integral test.
 - c.) Converges by comparison test, limit comparison test, or integral test
 - d.) Diverges by comparison test or limit comparison test
 - e.) Converges by limit comparison test
 - f.) Converges by comparison test or limit comparison test
 - g.) Converges by comparison test or limit comparison test
- 2. $S_{10}=1.082036583,\,R_{10}<\frac{1}{3000}$ 3. a.) The series converges, but not absolutely.
- - b.) The series converges absolutely
 - c.) The series diverges by Test for Divergence
 - d.) The series diverges by the Ratio Test.
 - e.) The series converges absolutely by the Ratio Test.
 - f.) The series converges absolutely by the Ratio Test.
- 4. Converges absolutely by Ratio Test;

$$S_2 = \frac{(-3)^0}{1!} + \frac{(-3)^1}{3!} + \frac{(-3)^2}{5!}$$

$$|R_2| \le \frac{3^3}{7!}$$

5. Approximate the series with the 10th partial sum:
$$S_{10}=-1+\frac{1}{4}-\frac{1}{9}+\frac{1}{16}+\ldots+\frac{1}{100}$$
