Special Notifications
In the upper right portion of the student homepage, click on Notifications.

From the settings tab, you can select different notifications you would like WebAssign to send you.
Click on the Notification Contact Info tab and verify that the email address in the system is correct. If your email address is correct, click on Verify this email address. If it is not correct, fill out a Student Help Request Form stating you want your email address in WebAssign changed, and the online homework director will change your email address.

Since we use NetIDs to log in, TAMU can not use this part of the form. To change your email address, fill out a student help request form.
