## Set-Up of Online Assignments

# Overview

- For each section of the textbook that is covered in class, there is a “Practice Assignment” and a “Homework Assignment”. For some students there may be “Tutorial Assignments”, but not necessarily for every section covered in the textbook.

The next few pages of this tutorial describe these three types of assignments in more detail.

My Assignments
Current Assignments (18)
Name
<a href="#">Homework 01 Math 251 - Section 11.1</a>
<a href="#">Homework 02 Math 251 - Section 11.2</a>
<a href="#">Homework 03 Math 251 - Section 11.3</a>
<a href="#">Homework 04 Math 251 - Section 11.4</a>
<a href="#">Homework 05 Math 251 - Section 11.5</a>
<a href="#">Homework 06 Math 251 - Section 11.6</a>
<a href="#">Practice 01 Math 251 - Section 11.1</a>
<a href="#">Practice 02 Math 251 - Section 11.2</a>
<a href="#">Practice 03 Math 251 - Section 11.3</a>
<a href="#">Practice 04 Math 251 - Section 11.4</a>
<a href="#">Practice 05 Math 251 - Section 11.5</a>

# The Practice Assignment

---

- The practice assignment is just that...*practice*. It is an opportunity for you to work problems similar to the problems you will work in the homework assignment. The practice assignment gives you a “sneak peek” of the type of questions that appear on the homework assignment.
- Each question on the practice assignment can be submitted up to twenty times.
- Once you submit your answers to the problems on the practice assignment, you will receive immediate feedback on whether your answers were correct  or incorrect . If your answer was incorrect, the correct answer will be displayed.

# The Practice Assignment (cont.)

- For some questions on the practice assignment, various help buttons may be available. Click on the buttons to receive extra help on the question associated with the button.

- The score you obtain on these practice problems will not affect your course grade (i.e. the weight of the practice assignments is 0%), but you still need to do the practice assignments so you have a better chance of success on the homework assignments.

---

# The Homework Assignment

- The homework assignment has problems that are similar to the practice assignment, but there are some important differences:
  - The score you obtain on the homework assignment DOES affect your course grade.
  - You will receive feedback on whether your answers are correct or incorrect, BUT the correct answer for each problem will NOT be shown until after the assignment's due date.
  - Each problem on a homework assignment can be submitted up to three times. Thus, if you answer a question incorrectly on the first try, you have two more opportunities to answer the question correctly. When a question is answered correctly, no further submissions are necessary. WebAssign will record the grade you earned on the last submission.
  - Links to videos and other tutorials are not available.

---

# The Tutorial Assignment

---

- The tutorial assignments contain active examples and other tutorials that you can use to help learn the concepts. In these assignments, you will find links to videos, links to the textbook, and examples that take you through a solution step by step. These tutorial assignments are not worth any points, but they do contain information will help you better understand the content presented in the section.
- Not all courses have tutorial assignments.
