

Solutions to Week in Review 6

1. $y = \sqrt[3]{3x^3 - \frac{1}{2} \sin 3x + \frac{3}{2}C}$
2. $y = -\sqrt{2 \ln|x| + 2x + 14}$
3. $y = \tan(x - x^2)$
4. The salt water problems are usually easier to solve if you view the differential equation as a linear one as opposed to a separable one. Either technique will work, however.
5. $y = e^x + 3e^{-x}$
6. $y = x(\ln \frac{x^2}{64} + \frac{1}{4})$
7. $y = 2 + e^{-x^3}$
8. $y = \frac{e^{x^2} + 2C}{2x^2}$
9. $10 - 10e^{-0.6}$, or ≈ 4.512 kg of salt
10. $5e^{-0.04}$, or ≈ 4.8 kg of salt
