

Setting Up Your PC for Remote Access to Calclab

You can use the NX Client from Nomachines to work directly on calclab1.math.tamu.edu over the internet using the GUI interface you would see in the actual Calclab. There are free versions for Windows 2000/XP/Vista, Mac OSX 10.3/4/5, and various distributions of linux (Suse 10.3/Fedora 10). The download site is

<http://www.nomachine.com/download.php>

The configuration is straightforward:

- Login and Password are those that you use on calclab1.
- Session is calclab1.
- Host is calclab1.math.tamu.edu.
- Desktop is unix KDE.
- Speed is ADSL.
- Display can be set to Available area.
