Daily Problem

Recall the land of Konigsberg below, consisting of four regions connected by seven bridges:

![Konigsberg Diagram]

1. Explain why it is not possible to walk throughout the land crossing each bridge exactly once.

2. Suppose the queen of region C wants to build an eighth bridge so she can start in her region, travel each bridge exactly once, and end at the central island to brag of her achievement. Between which two islands should she build the new bridge, and why?
