

## Math 172 Exam 2 Description

- The Exam is scheduled as Wednesday, March 23 and it will be given during the regular class time.
- The exam covers sections 8.4, 8.8, 8.9, 9.1, 9.3
- You do not need a scantron for this exam.
- Things to bring to the test: pencil, eraser and your student identification card.
- It is **advised** that you
  - read over the lecture notes (read also Key Points List.)
  - work the quizzes;
  - for topics you are struggling with, rework the associated homework problems and problems we did in class;
  - For extra practice do Exam 2 Review.
  - It is advised to review integration techniques from the Exam 1 material. *Note that you should also demonstrate a conceptual understanding of material and that you have learned the appropriate definitions and theorems.*
