## Math 220 HNR - Homework 1

## Due Thursday $9 / 6$ at the beginning of class

PART A
Total points: 219 (Problems marked by $*$ will count toward writing portion.)

Problems from the textbook:

- page $65 \# 2.410$ points, 2.810 points, 2.3210 points

## PART B

1. 21 points Determine whether each of the following sentences is a proposition, predicate, or neither.
(a) Give me a call.
(b) The train is leaving in 30 minutes.
(c) Excessive exposure to the sun may cause skin cancer.
(d) $13^{12}>12^{13}$.
(e) $x^{2} \neq-1$.
(f) For every real number $r, r^{4} \neq-1$.
(g) If $p$ and $q$ are rational numbers, then $p-q$ is rational.
2. 20 points State the negation for each of the following propositions.
(a) The perimeter of the square is at most 2018 inches.
(b) Two sides of an isosceles triangle have the same length.
(c) The point $M$ on the plane lies outside of the polygon $\Pi$.
(d) The number $\sqrt{2018}$ is rational.
(e) The number 0 is negative.
3. 32 points Consider the propositions $P: 2018 \in 3 \mathbb{Z}$ and $Q: 3^{2018} \in \mathbb{O}$. Write each of the following compound statements in words and indicate whether it is true or false.
(a) $P$;
(b) $Q$;
(c) $\neg P$;
(d) $P \vee Q$;
(e) $P \wedge Q$;
(f) $P \Rightarrow Q$;
(g) $\neg Q \Rightarrow P ;$
(e) $P \Leftrightarrow Q$.
4. 10 points For the predicate $P(x):\left(x^{3}+1\right)\left(x^{2}-2\right)=0$, where $x \in \mathcal{U}$, determine:
(a) the values of $x$ for which $P(x)$ is a true statement if $\mathcal{U}=\mathbb{R}$.
(b) the values of $x$ for which $P(x)$ is a false statement if $\mathcal{U}=\mathbb{N}$.
5.     * 10 points The professor tells to Amy: "If you get at least $B$ on the final exam, then you will pass the course". Amy passes the course. What can she conclude?
(a) She got at least $B$ on the final exam.
(b) She cannot conclude anything.

Give reasons for your answer.
6. * 10 points The professor tells to Amy: "If you get at least $B$ on the final exam, then you will pass the course". Amy finds out that she got a $C$ on the final. What can she conclude?
(a) She'd better start looking for a summer school course.
(b) There's still hope.

Give reasons for your answer.
7. 6 points Without changing their meanings, convert each of the following sentences into a sentence having the form "If $P$, then $Q$."
(a) "You fail only if you stop writing." (Ray Bradbury)
(b) "Whenever people agree with me I feel I must be wrong." (Oscar Wilde)
$\qquad$

## 70 points PART C*

Read Chapter 0 ("Communicating Mathematics") in the textbook. Using the information provided in Chapter 0, correct and then rewrite each sentence. Then using complete sentences give a reason/s to changes you made.

1. In mathematics, an irrational number $r$ is a real number that cannot be expressed as a ratio of integers, e.g. as a fraction.
2. Let $a, b, c, M$, and $N$ be given integers.
3. $m^{4}+m^{2}+2018$ is positive for every real $m$.
4. Pure mathematics topics often turn out to have applications, i.e. number theory in cryptography.
5. If $x, y$ are integers of the same parity, then $x+y$ is even.
6. The square of every integer $n$ is even.
7. $f$ is differentiable everywhere.
8. Every number $\in \mathbb{E}$ is divisible by 2 .
