## Math 220 - Homework 7

## Due Friday 03/27 at the beginning of class

Total points: 190

## PART A

Problems from the textbook:

- Section 4.2 | problem | $2^{*}$ | $5(\mathrm{a}, \mathrm{b}, \mathrm{d}, \mathrm{e})^{*}$ | $6^{*}$ | $7(\mathrm{a})^{*}$ | $8^{*}$ | $9^{*}$ | $10^{*}$ | $12^{*}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | points | 10 | 40 | 10 | 10 | 20 | 20 | 20 |

## PART B

1. [10 points] Let $A, B$, and $C$ be nonempty sets. Prove that if $A \subseteq B$, then $A \cup C \subseteq B \cup C$.
2. [10 points] For a real number $r$, define $S_{r}$ to be the interval $[r-1, r+2$ ]. Let $A=\{1,3,4\}$. Write the sets $\bigcup_{\alpha \in A} S_{\alpha}$ and $\bigcap_{\alpha \in A} S_{\alpha}$ in a simpler form (as either an interval or a finite set of points). Show all steps leading to your final answer.
3. [10 points] Let $K=\{a, b, c\}, L=\{b, d, e\}, M=\{b, e, f\}$ and $S=\{K, L, M\}$. Write the sets $\bigcup_{X \in S} X$ and $\bigcap_{X \in S} X$ in a simpler form (as either an interval or a finite set of points). Show all steps leading to your final answer.
