INSTRUCTIONS:

Mark the correct choice on your ScanTron form using a #2 pencil. Please, also record your choice on the exam! If you find that none of the answers is correct or there are at least two correct options listed to answer a question, write clearly on your exam sheet “none of the answers is correct” or “there are at least two correct options listed”. The exams and ScanTrons will be collected after two hours. Each problem is worth 4 points; NO partial credit will be given. Calculators and books are NOT allowed to use during the exam. The problems are established so that each calculation can be carried out by hand. You may use any of your notes you made related to this class. However, after the first serious complaint about noise you may not be allowed to search heavily for the solutions.
