INSTRUCTIONS

1. In Part 1 (Problems 1–9), mark your responses on your ScanTron form using a No. 2 pencil.
For your own record, mark your choices on the exam as well.
2. Calculators **should not be used** throughout the examination.
3. In Part 2 (Problems 10–14), present your solutions in the space provided. **Show all your work** neatly and concisely, and **indicate your final answer clearly**. You will be graded, not merely on the final answer, but also on the quality and correctness of the work leading up to it.
4. Be sure to **write your name, section number, and version letter of the exam on the ScanTron form**.
