* DESCRIPTION: This is the honors section of the second course in calculus for engineering
  majors and covers sections 7.1-11.3 of Stewart’s Calculus.  This includes techniques and
  applications of integration and sequences and series.  You will learn the computer algebra
  system Maple and the Math word processor Scientific Notebook.
  Differentiation and integration techniques and their applications (area, volumes, work),
  improper integrals, approximate integration, analytic geometry, vectors, infinite series, power
  series, Taylor series, computer algebra (Maple). Prerequisite: MATH 151 or equivalent. Credit
  will not be given for both MATH 152 and 172.
