

# Homework 8

Math 669, Spring 2022

This homework is due on Monday, April 4.

*This homework pertains to your final project.*

1. Write a (partial or full) draft of your final paper. The requirements are as follows:
  - Length requirement is 1.5 pages (single-spaced, 12-pt. font, 1-inch margins, figures are warmly welcome but do not count to the page requirement).
  - Suggested sections:
    - (a) the introduction (what mathematical/scientific questions does the article you are reading address? what are the objectives?),
    - (b) the (mathematical/scientific) background,
    - (c) results (where you will state one main result from the article and then interpret and explain its significance).
  - *Please print 2 copies of your draft. As part of a future homework, each student, plus the instructor, will critique another student's draft.*
