

$$a_0 = 1, a_1 = \sqrt{7} = 2.6 \Rightarrow (1, 2.6) / a_2 = \sqrt{7a_1} = 4.3 \Rightarrow (2.6, 4.3)$$

$$a_3 = \sqrt{7a_2} = 5.5 \Rightarrow (4.3, 5.5)$$

$$a_0 = 9, a_1 = \sqrt{7 \times 9} = 7.9 \Rightarrow (9, 7.9)$$

$$a_2 = \sqrt{7 \times a_1} = 7.9 \Rightarrow (7.9, 7.9)$$
