The is due at the start of class on September 28. Type your name in the first page of the spreadsheet. Be sure to work each problem on a separate spreadsheet. Don't forget to e-mail me your spreadsheet.

The help button, a question mark, can help look up commands and see the syntax of the commands.

The vlookup command will look up a number from a table. For example: $=\operatorname{VLOOKUP}(\mathrm{A} 1, \mathrm{D} 1: \mathrm{E} 10,2)$ will look up the value in cell A 1 in column D of the table(D1:E10) and will return the number in the adjacent cell (in column E).

Problem 1: Create a probability distribution for the sum when rolling two fair 6 sided die. Give all probabilities to 4 decimal places. You should be able to quickly change the probabilities for the die to get other probability distributions.

| Sample Space | Probability |
| :---: | :--- |
| 2 |  |
| 3 |  |
| 4 |  |
| 5 |  |

| Sample Space | Probability |
| :---: | :--- |
| 6 |  |

| 10 |  |
| 11 |  |
| 12 |  |

Problem 2: Use the work in part 1 to quickly find the probability distribution when rolling two 6 sided die that are unfair. Give all probabilities to 4 decimal places. Note: if you did problem 1 correctly, then you can easily get these answers.

| Die 1: | 1 | 2 | 3 | 4 | 5 | 6 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| prob. | 0.15 | 0.2 | 0.1 | 0.1 | 0.35 | 0.1 |

| Die 2: | 1 | 2 | 3 | 4 | 5 | 6 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| prob. | 0.2 | 0.3 | 0.15 | 0.1 | 0.15 | 0.1 |

| Sample Space | Probability |
| :---: | :---: |
| 2 |  |
| 3 |  |
| 4 |  |
| 5 |  |

| Sample Space | Probability |
| :---: | :---: |
| 6 |  |
| 7 |  |
| 8 |  |
| 9 |  |

| Sample Space | Probability |
| :---: | :---: |
| 10 |  |
| 11 |  |
| 12 |  |

Problem 3: Now create a probability distribution that shows the sum of the dice when rolling rolling three 4 sided dice. The distribution should give all probabilities to 4 decimal places. Be sure that the chart is clearly labeled in the spreadsheet. It should be at the top of the page. I will grade your results by changing the probabilities and seeing if everything is correct.
